

unicard school

WEB PORTAL and MOBILE

Online access to account transactions and details, input and output records, canteen menu, schedules, grades and absences. Reserve meals, request documents and receive messages. With the mobile application you can check the user's information and perform operations in the system. Compatible with all operating systems (iOS, Android, ...).

NOTIFICATIONS

Sending SMS messages or personalized email to a user, or automatic messages to notify of delays or not no-shows at lunch.

ATM

Top up the account from the ATM network using the entity/reference giving on signing in, or use home banking (online banking);

MB WAY (NEW)

With MB WAY you can associate your bank cards to your mobile phone number and immediately start shopping or transfer money in a simple, convenient and fast way through your smartphone or tablet. Does not require data banking. Just use your mobile number with PIN and daily amount limit. No membership fees.

Unicard School is an integrated school management system, designed to support the routines of educational communities, by promoting the comfort, well-being and safety of goods and people. The streamlining of processes and easy access to valuable information promotes the increasing service efficiency, resource optimization and responsiveness.

Unicard School is a web technology-based solution that combines media intelligent identification of users (RFID card, wristband or button) to manage access to the school campus and to specific areas, whilst also facilitating micropayments within the school.

Unicard School is certified by AT (Standard Audit File for Tax Purposes – Portuguese version), with the number 963, and is designed to produce SAF-T(PT) files.

Main system

ACCESS

Manage access to school campus and specific rooms, based on school schedules. Visitor registration.

SALES

Sales, top up account, orders, suppliers and inventory management.

MEALS

Schedule and cancel meals plus on-the-spot sales. Effective control of consumption.

STATISTICS

Central management. Intuitive and highly informative dashboard. Easy to customize. Extract reports and SAF-T(PT) files. Alerts via SMS/Email.

Additional features

PRINTING AND COPYING

Print and copy documents, deducting the cost from the user's account.

VENDING MACHINES

Product purchase, deducting the cost from user's account. Consumption and stock analysis management.

KIOSK

Top up user account (notes, coins and bank card). Purchase of products. Consult user information and perform various operations.

TURNSTILES

Physical barrier to control or deny access to specific locations.

ATTENDANCE

The system detects absenteeism through biometric validation or RFID cards.

LIGHT ALARMS

Light alarms to replace or complement the school bell. Connected to school schedule to signal the beginning and end of classes.

ACCOMPANIED CALL

Student call, in class or on panel. Indication of which adult awaits the student and where.

SPACE MANAGEMENT

Book and lease institutional facilities, such as gyms or pools.

SMART LOCKERS

Manage lockers using intelligent identification IDs.

TRANSPORTS

Manage bus pass payment and use permissions as a function of students' schedules.

BILLING

Bill automatic fees and extra activities.

GROUPS OF SCHOOLS

Integrated management of central and satellite schools using a single card and a single balance.
